Professional Summary

Frontend-focused Software Developer with 1+ year of professional experience building production web applications using React.js, Next.js, TypeScript, and JavaScript. Experienced in developing business-driven interfaces, responsive dashboards, onboarding and document-management workflows, CMS features, and REST API integrations, with additional exposure to Node.js, databases, third-party services, and deployment support.

Technical Skills

Programming — JavaScript (ES6+), TypeScript, Python
Frontend — React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design, Reusable UI Components.
State Management — Redux, Redux Toolkit, Context API, React Hooks
Backend & Databases — Node.js, Express.js, MongoDB, PostgreSQL, MySQL.
Tools & Testing — Git, GitHub, Postman, Jest, React Testing Library.
Deployment & Infrastructure— GitHub Actions, Cloudflare Tunnel, Ngrok, Linux, Nginx.
Core Strengths — Reusable UI development, API integration, debugging, problem solving, teamwork, adaptability.

Professional Experience

Junior Software Developer (Promoted from Software Developer Intern) | Midas Management and Research | Jul 2025 – Jul 2026

Artemis — Multi-Tenant SaaS ATS Platform

- Developed responsive web interfaces and business-driven features using React.js, Next.js, TypeScript, and reusable components for a production multi-tenant Applicant Tracking System (ATS).
- Built candidate onboarding workflows, recruiter dashboards, and document-management interfaces based on product requirements, integrating REST APIs to support dynamic data and application workflows.
- Contributed to the Credential Storage System by implementing document upload interfaces, version history, and activity logs; collaborated with a senior backend developer on document-versioning design.
- Debugged frontend issues, improved API request handling, and collaborated with backend developers to deliver reliable application features.

CMS and Website Development

- Developed React.js and Next.js interfaces for CMS and website-management features based on business requirements, including blogs, articles, news, and press releases.
- Implemented content-management workflows for meta titles, meta descriptions, and canonical URLs, integrating frontend components with backend REST APIs.

Checklist Module — Backend Integration

- Enhanced and maintained a Node.js-based Checklist module, supporting checklist workflows and backend functionality.
- Investigated redundant API calls and multi-tenant MongoDB connection issues, implementing request guards, request sequencing, and connection caching to improve application reliability.

Third-Party Integrations and Deployment Support

- Integrated third-party services, including Mailgun APIs for email campaign management and Groq/LLM APIs for resume-parsing workflows.
- Supported production environments using Linux, Nginx, SSL configuration, Cloudflare Tunnel, and Ngrok; worked with GitHub Actions for API testing automation.

Selected Projects

Real-Time Chat Application

- Built a real-time one-to-one chat application using React.js, Node.js, Express.js, and MongoDB/Mongoose, with responsive UI and frontend/backend integration.
- Implemented JWT authentication, protected REST APIs, user search, chat/message workflows, profile-picture uploads, real-time messaging, and online-status indicators with Socket.IO.

AI Learning Platform

- Built an AI-powered learning platform where users create topic-specific learning companions and engage in personalized one-to-one conversations.
- Developed responsive dashboards, authentication, dynamic routing, and reusable components; used Supabase PostgreSQL for companion configurations and session history and Vapi for real-time voice tutoring.

Education

Bachelor of Technology in Computer Science — **2021 – 2025**
Satyug Darshan Institute of Engineering and Technology — **CGPA:** 8.6

Certifications

Namaste React — Certificate of Completion | Akshay Saini
React.js course covering React fundamentals, JSX, components, props, state, hooks, React Router, Redux Toolkit, performance optimization, and production best practices.
